

PharmaLinings for Volkswagen Nutzfahrzeuge Transporter (PharmaMobil)

With Hahlbrock pharmaceutical linings, your new van is fit for the implementation of the German law on the manufacture of pharmaceuticals and active substances (Arzneimittel- und Wirkstoffherstellungsverordnung, AMWHV cl. 7) and complies with the Austrian Austria's laws on the storage and transport of pharmaceuticals (Arzneimittelbetriebsverordnung, AMBO 2009). The PharmaMobil guarantees the prevention of permanent changes to the quality as prescribed because it ensures constant ambient conditions. Optimum insulation of the load compartment and the rear doors plus an air-conditioning system tailored to the needs of pharmaceuticals in conjunction with the upgraded driver's cab air-conditioning system ensure perfect transport conditions of +15 to +25°C. The temperature is conveniently regulated via a digital control in the driver's cab and the vehicle is prepared for the installation of temperature measuring devices in order to satisfy current and future statutory requirements.

with controlled temperature
from +15° up to +25° C

Hahlbrock is
PremiumPartner
von Volkswagen Nutzfahrzeuge.

The Hahlbrock PharmaLinings solution

insulating lining

- Interior lining made from moulded GRP parts
- High-quality insulating materials
- Insulated floor
- Non-slip finish to vehicle floor
- Load restraint fittings in vehicle floor (load lashing rings)
- 2 interior lights in load compartment with on/off switch fitted
- Standard pressure relief in load compartment (door closing pressure)
- Pressure relief for driver's cab airbag activation
- Simple removal and re-installation when changing vehicles (applies to identical models only)
- 48-month warranty on Hahlbrock interior lining

Air-conditioning system

- Combined with the factory-fitted upgraded air-conditioning system
- Digital control in driver's cab
- Separate temperature control for driver's cab and load compartment
- Constant, user-controlled temperature setting between +15 and +25°C
- 4 integral high-level outlets in load compartment roof lining
- Prepared for the later installation of temperature measuring devices
- **Certificate of No Objection issued by Volkswagen Nutzfahrzeuge**
- 24-month warranty on air conditioning
- Maintenance-free

GRP interior linings – hygienic but tough

The pharmaceutical linings in Hahlbrock quality are assembled from moulded glass fibre-reinforced plastic (GRP) parts. With their smooth, impact- and abrasion-resistant surfaces, the moulded GRP parts are strong where they need to be but at the same time as light as possible. The GRP material used does not corrode, can handle heavy loads and is easy to clean.

Interior lights with a separate switch, protective aluminium edge trims to all door sills and pressure relief in load compartment and driver's cab are standard with all interior linings.

Technical Data Transporter PharmaLinings

Dimensions		Transporter (L1H1)	Transporter (L2H1)
		RS 3.000 mm Roof height Low	RS 3.400 mm Roof height Low
Inside length	a	2.345	2.775
Inside width	b	1.520	1.490
Inside height	c	1.225	1.275
Width between the wheelhouses	d	1.205	1.185
Passage width sliding door	e	820	900
Passage height sliding door	f	1.225	1.225
Passage width rear		1.260	1.185
Passage height rear		1.235	1.190
Data in mm			
Lining weight in kg (ca.)		130	150
Load volume in m ³ (ca.)		3,4	4,6

Hahlbrock quality puts you on the road to success

Our interior linings are characterised by their practicality. With its convenient loading and unloading, the tailored interior dimensions and the simple cleaning of the interior, your new pharmaceuticals vehicle in Hahlbrock quality will be a delight to use every day. You will realise that we know what's important for you.

The introduction of a quality assurance system and accreditation to DIN EN ISO 9001 help us to achieve our goal of a constant, high standard of quality. That's why all our interior linings come with a 48-month warranty.

Practical ideas for practical people

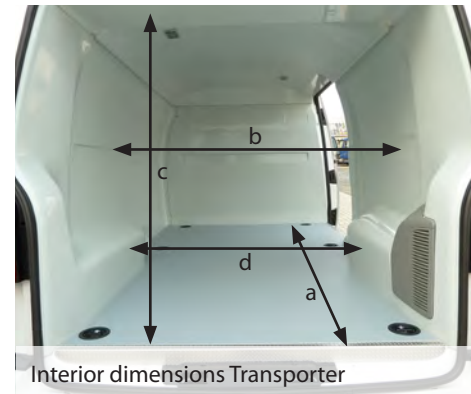

The quality of our linings complies with current standards and regulations and also satisfies future statutory requirements for the transport of pharmaceuticals. Our experience with the practical everyday needs of many trades has provided us with a broad range of knowledge specific to each sector and more than 40 years of expertise in the processing of fibre-reinforced polymers. This extensive know-how ensures that you get a vehicle you can rely on to ease your work and optimise your costs.
